

Environmental Policy

The policy of ECS Consultants is to encourage respect for the environment and the adoption of an environmentally responsible attitude in the fulfilment of business objectives.

The pursuit of this policy requires ECS Consultants to focus attention upon the following key principles:

Environmental Legislation - ECS Consultants complies with all relevant environmental obligations including environmental legislation, regulations, codes of practice, and other regulations to which it subscribes.

Management System - ECS Consultants has implemented a documented environmental management system. We have set environmental Objectives and targets, we monitor performance, and are committed to the continual improvement of the environmental management system to enhance environmental performance.

Communication - ECS Consultants promotes awareness amongst employees (and where applicable sub contractors) of the importance of environmental issues to the business, and the environmental impact of the business activities. This Policy is available to the public and stakeholders on request.

Resources and Materials - ECS Consultants will conserve resources and materials, and manage their use efficiently, through implementation of waste minimisation programmes, and by encouraging the use of recycled materials, where appropriate.

Operation of the Business

ECS Consultants operates the business efficiently, with due consideration for environmental, social and economic impacts and values, and our relative competitive position.

To satisfy customer requirements we provide Building Services Design Solutions including planning, mechanical and electrical engineering design and project management.

A high value will be placed on the control and improvement of environmental performance, and we are committed to the protection of the environment and the prevention of pollution.

The environmental impact of significant changes to equipment or processes is assessed as part of the approval process.

Products - The Processing of the products that ECS Consultants supply include consideration of environmental impact throughout the product life cycle.
